## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: page 6, lines 17 and 20 reference item 12 as different terms. Line 17 references item 12 as a "handle," while line 20 references character 12 as the "body." Please use uniform terminology when referring to reference characters.

Page 9, line 12 states, "extended into the races." Given the context, it is assumed that "races" is an incorrect spelling of --recess--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 101***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-14 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-14 of prior U.S. Patent No. 6676668. This is a double patenting rejection.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15 and 16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15 and 16 of U.S. Patent No. 6676668. It is clear that all the elements of claims 15 and 16 are to be found in claims 15 and 16. The difference between the application claims and the patent claims lie in the fact that the patent claim is more specific wherein it discloses "at least three legs" rather than a "plurality" as disclosed by the application. Thus the invention of claims 15 and 16 of the patent is in effect a "species" of the "generic" invention of claims 15 and 16 of the application which disclose a "plurality of legs." It has been held that the "generic" invention is anticipated by the "species." See *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims 15 and 16 of the application are anticipated by claims 15 and 16 of the patent, the claims are not patentably distinct.
